

# Eberl Iron Works, Inc Custom Formed Hems

## U-Edging Hems

Custom formed steel U-Edging Hems are used to enclose expanded metal, wire meshing and perforated sheet steel.

Hems provide a smooth u-shaped edging around exposed ends of jagged sheet steel. Common applications include; handrail filler panels, wire screening and architectural designs. Eberl Iron Works, Inc. Hems are rigid and weldable providing cost effective protection to fabricated filler panels. Eberl Iron Works, Inc utilizes CNC equipment and quality tooling to assure accurate dimensions and quality on our custom steel

### Material:

Hot rolled, Cold Rolled, Pre-Galvanized, Stainless Steel and Aluminum,

Thickness:

20 ga - 10 ga \*dependent on material type
