

## Metal U-Edging Hems

### WHY YOU SHOULD USE METAL HEMS:

- Safety
- Durability
- Aesthetics
- Ease of Installation

**HEMS** are formed u-shaped metal closure strips used to cap the edges of expanded metal, wire mesh or perforated panels.

Hems are typically 1" high, with opening widths formed to customer specifications: from 1/8" to 3/8".

Hems are available in : Carbon Steel, Stainless Steel, Aluminum and Galvanized finishes.
